Desk Clamp Mount

Part Number:

Black: **A00041**
Silver: **A00041-S**

Ergotech desk clamp mounts are easily installed on any new flat desk surface. This is an ideal solution for single and dual LCD monitor mounts.

Grommet Mount

Part Number:

Black: **A00034**
Silver: **A00034-S**

Grommet mounts easily attach to any flat surface with an existing hole. If there is no existing hole, a 5/16" hole must be created. This option provides a simple way to attach to a flat work surface with underside access. This is an ideal solution for single and dual LCD monitor mounts.

Flush Mount

Part Number:

Black: **A00103**
Silver: **A00103-S**

The flush mount can be fastened to any flat surface with screws or through-bolts (preferable). The single flush mount is available in numerous bottom plate configurations. These allow mounting to multiple interfaces such as rail with T nuts and recessed with standard nut and bolt or simple screws. The single flush mount provides extra strength and stability for larger single and dual LCD monitor mounts.

Slat Wall Mount

Part Number:

Black: **A00214**

The single slat wall mount is designed for single and dual LCD monitor mounts. Contact Ergotech to verify compatibility between your slat wall and our single slat wall bracket mount.
